MOTOR DRIVER

The image displays three identical circuit diagrams for motor drivers, each enclosed in a dashed red box. Each circuit features a DRV8870DDA motor driver IC (U3, U4, or U5) with the following components and connections:

- Power Supply:** A +12V supply connected to the VM pin (pin 5) and a GND connection to the GND pin (pin 1).
- Control Signals:** Two control inputs, IN1 (pin 3) and IN2 (pin 2), are connected to CW and CCW signals (e.g., CW_1, CCW_1 for U3; CW_2, CCW_2 for U4; CW_3, CCW_3 for U5). A VREF pin (pin 4) is connected to GND.
- Feedback:** An ISEN pin (pin 7) is connected to a 0.15 ohm resistor (R4, R5, or R6), which is then connected to GND.
- Output Stage:** The driver has two output pins, OUT1 (pin 6) and OUT2 (pin 8). These are connected to a diode (D1, D2, or D3, SMF12CA) and a 100nF capacitor (C10, C11, or C12) in parallel. The output is connected to a connector (J1, J2, or J3, Conn_01x02).
